Using a version of Dynamics AX that is not Dynamics 365?

While support for your existing version of Microsoft Dynamics AX may be expiring soon, this is the best time to upgrade to Microsoft Dynamics 365 from your existing on-premise version of the ERP. Opt for digital transformation today and experience a whole new world of feature enhancements and benefits. Replacing your existing system might seem like a daunting task which is why you should partner with us for a smooth transition. Let us help you stay updated on the latest technology so you can see your business grow significantly.

Key Benefits of Upgrading to Dynamics 365

Cost Effective

Upgrading to Microsoft Dynamics 365 will significantly reduce infrastructure, hardware and maintenance costs that are involved on an on-premise version of Microsoft Dynamics AX. You can now manage your business with ease without having to worry about your software.

Enhanced Productivity

You don't have to depend on stand-alone business applications anymore. With its seamless integration across applications and solutions, you can now have a unified user experience and increase employee productivity.

Improved Security

With a robust security system that includes built-in access controls, encryption and authentication, Microsoft Dynamics 365 allows you to keep your business and your data safe and centralized.

Increased Accessibility And Collaboration

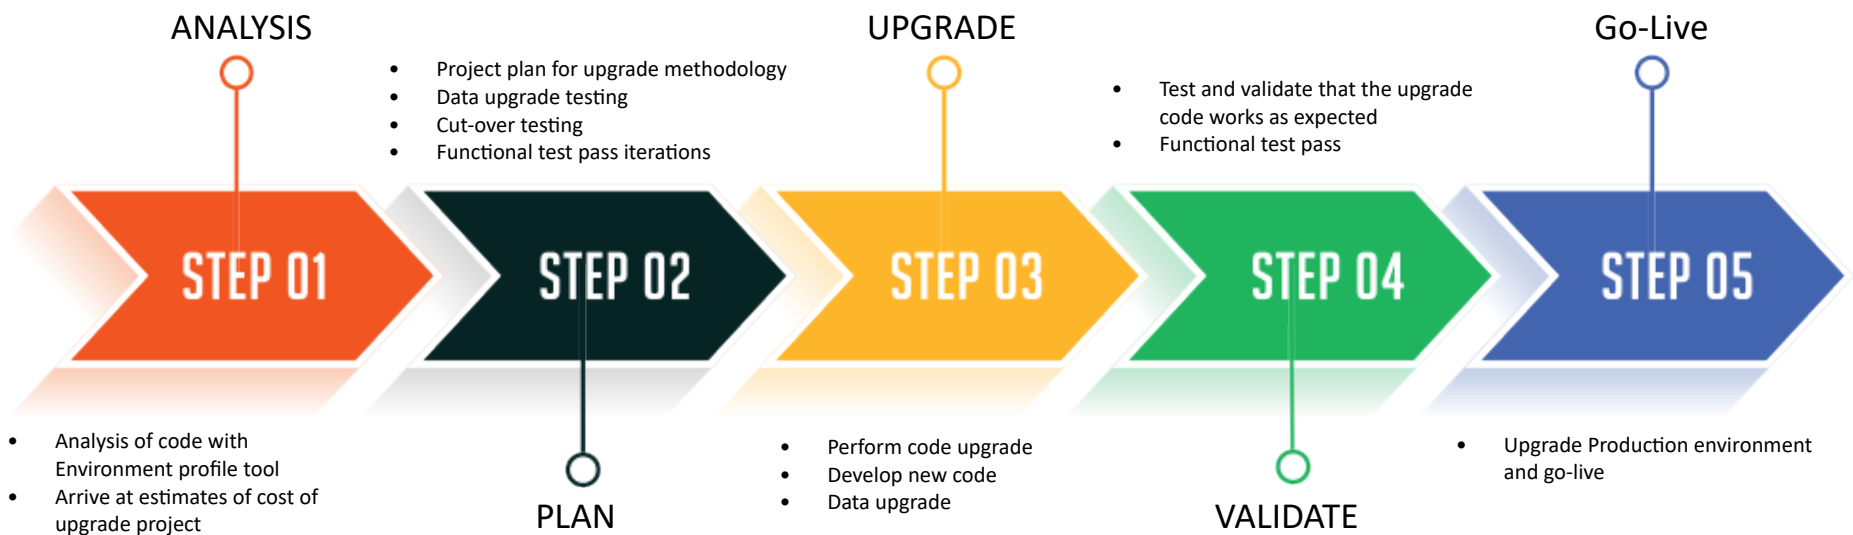

You don't have to depend on stand-alone business applications anymore. With its seamless integration across applications and solutions, you can now have a unified user experience and increase employee productivity.

Support for Microsoft Dynamics AX continues as

PRODUCTS RELEASED	LIFE-CYCLE START DATE	MAINSTREAM SUPPORT END DATE	EXTENDED SUPPORT END DATE
Microsoft Dynamics AX 2009 Service Pack 1	November 3, 2008	April 10, 2018	October 12, 2021
Microsoft Dynamics AX 2012	September 25, 2011	October 9, 2018	October 12, 2021
Microsoft Dynamics AX 2012 R2	February 19, 2013	October 9, 2018	October 12, 2021
Microsoft Dynamics AX 2012 R3	August 1, 2014	October 12, 2021	January 10, 2021

What is the upgrade process?

Considering an upgrade but not ready for D365 yet?

We get it. While upgrading to the latest version might not be part of your business plan yet, you can still experience a wealth of benefits from just upgrading from a lower version of Microsoft Dynamics AX to a higher one. From a whole new list of feature enhancements and capabilities, deployment options, industry specific solutions and so much more, every version of Microsoft Dynamics AX offers newer improved solutions that enable you to maximize your investment in the ERP suite.

Why choose AXImprove as your upgrade partner

Having worked with Microsoft Dynamics since Damgaard Axapta 1.0, we have successfully delivered in all types of challenging upgrade scenarios. From multiple version skips to CfMD based upgrades, MS SQL to Oracle, Oracle to MS SQL, we have done it all. While we help customers directly, we more often assist our Partners to get it right for their customers.

With our proven track record of successful upgrades, our team of experts can assist and support you with the transition.
